

Waste pickers & Climate change

SWACH⁺#

A higher level of self-reliance

We collect, we sort, **we recycle**... we're climate change agents!

- We collect **15% - 20%** of Punes waste (paper, metal, glass, organic waste...), sort it into almost 13 categories and recycle everything we can. Our recycling helps the PMC keep the city clean.
- We **reduce harmful green house** gases like Carbon Dioxide and Methane and ensure that you have cleaner air to breathe by recycling garbage.
- We **save 17 trees** of paper that we gather.. for **every ton** .!
- Without us, recycling in Pune would be close to Zero. There would be **20% more waste** on the streets, **20% less material** available for recycling.

SWaCH Pune Seva Sahakari Sanstha Ltd. is a collective of self employed wastepickers that provides waste collection and management services. It is authorised by the Pune Municipal Corporation.

Kothrud Kachara Depot, Paud Road, Kothrud, Pune – 411 038  T: 020-65000817
